

Activity 3

Year 3 Science: animals including humans

How to make Bat Wings

- Lay the plastic sack flat
- Cut off the sealed end
- Slit up one side, open it out and flatten the folds
- Refold it in half and pin
- Ask a friend to measure you from your neck to your wrist
- Cut a square of this size from the folded bag
- Use newspaper the same size as your black square to cut a paper pattern in the shape of the wing above
- Pin the pattern against the fold on the black plastic
- Cut it out carefully
- Use safety pins to fasten the straight edge along your arms and back from wrist to wrist
