

## Why are trees important to bats?

Trees and woodland are important to all 18 UK bat species. Many of our bats also make use of the natural features in trees for roosting although this can vary by species and at different times of year.

The colours and numbers represent each bat species.

-  **1** Barbastelle bat
-  **3** Natterer's bat
-  **5** Pipistrelle bat (3 species)
-  **2** Bechstein's bat
-  **4** Noctule bat
-  **6** Brown long-eared bat
